Operation word problems

1. Solve the following word problems
 - a. Jon is saving up to buy a new game. The game costs R495. So far, he has saved R346. How much more does he still need?
 - b. Mvu has 147 sweets. She wants to have the same number each day of the week (7 days). How many sweets can she have a day?
 - c. Linus, Cyran and Basil are brothers. As the oldest, Linus gets R45 pocket money a week, Cyran gets R36, and Basil (the youngest) gets R24. How much money do their parents pay altogether?
 - d. George has a game on his phone. In the game, he gets 48 gems every day. He decides to save them. How many can he save in 21 days?

2. Challenge question: this is a difficult one. Try it, and if you get stuck, look at the memo.
 - a. Charlotte is saving to buy a new wetsuit for lifesaving. The one she wants costs R650. She already has R225 saved. If she saves R25 a week, how many weeks will it be until she has enough?
