## Grade 5

### Maths

#### Constructing bar graphs and histograms

1. Given the following information, decide whether to create a bar graph or histogram and create it.

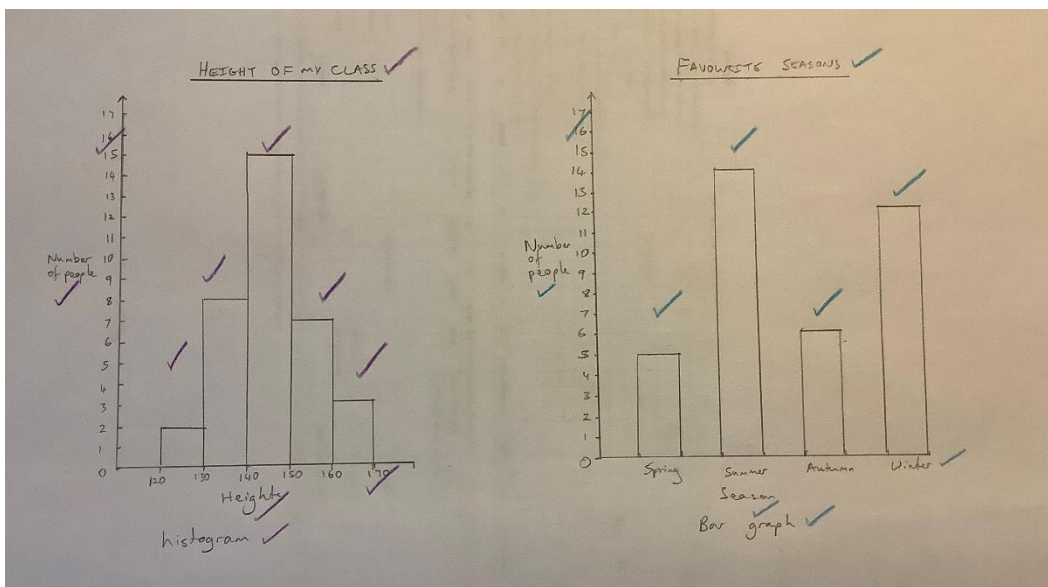

You did a survey of the heights of the children in your class and came up with the following results:

Height range	Number of children that height (frequency)
120cm - 129cm	2
130cm - 139cm	8
140cm - 149cm	15
150cm – 159cm	7
160cm – 169cm	3

2. Given the following information, decide whether to create a bar graph or histogram and create it.

You did a survey of the favourite season and came up with the following results:

Favourite season	Number of children who chose (frequency)
Spring	5
Summer	14
Autumn	6
Winter	12

Your title and axis names may differ, but you must have them.
