### Pie charts

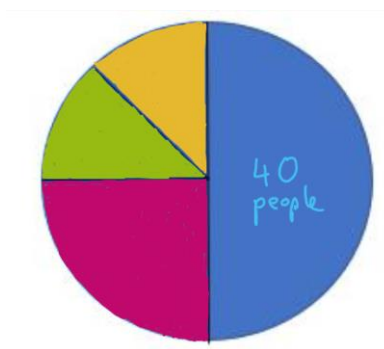

1. Examine the following pie chart and answer the questions that follow:

32 people were asked which season was their favourite. Use of sums to find the answers.

- How many people chose winter?
- How many people chose summer?
- How many people chose spring?
- How many people chose autumn?

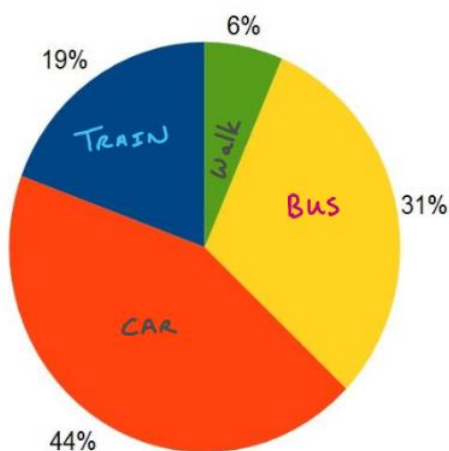

2. Examine the following pie chart and answer the questions that follow:

People were asked to choose their best colour from blue, pink, green, or yellow. 40 people chose blue. Using the sizes of the slices, work out the following:

- How many people chose pink?
- How many people chose green?
- How many people chose yellow?
- How many people were asked altogether?

3. Examine the following pie chart and answer the questions that follow:

People were asked about how they get to school in the morning. This pie chart shows the answers. Use the pie chart to answer the following questions.

- What is the most common way people get to school?
- Do more people use public transport (train and bus) or car?
- If 100 people were asked altogether, how many walk?
