### Maths

#### Bar Graphs

1. You collected information on what sold the most at the school tuckshop and the following graph was created.
  - a. Fill in the three things that are missing from this graph.
  - b. What was the most popular item at the tuckshop?
  - c. What was the least popular item at the tuckshop?
  - d. How many cooldrinks did the tuckshop sell?
  - e. How many chocolates did the tuckshop sell?

2. Your class did a survey of how everyone got to school and drew up the following graph.

- a. How many students use public transport to get to school?
- b. How many students take the train?
- c. If this is everyone on the class, how many students are there in the class?
- d. At least how many students probably live close to the school?
- e. Do you think that this survey was done in the rainy season or the dry season?
