#### Working with Ratios

1. You buy a bag of toffees. There are butterscotch and double butter flavours. The ratio of butterscotch to double butter is 4:5  
If there are 45 toffees altogether, how many butterscotch flavour are there?
2. You decide to count the knives and forks in the kitchen. The ratio of knives to forks is 6:7. If there are 12 knives, how many forks are there?
3. The ratio of right-handed people to left-handed people is 4:1. In your class there are 6 left-handed people. How many people are there altogether?
4. Sam has pens and pencils in a ratio of 4:3. If there are 24 pens, how many pencils are there?
5. Your mom shares out money between you and your younger sister in a 5:3 ratio. If you got R25, how much did your mom pay out altogether?
